List Area

Printers, groups, or sets available over the network are displayed in this area of the main CrownAdmin 3 window when CrownAdmin 3 is started (depending on whether the Printers, Groups, or Sets option button is selected above this area).

You choose the printer or group you want to configure from this list.

If the printer isn't displayed in the list, rescan the network for available printers by choosing the Rescan Network button or, if you're in a TCP/IP environment, add the printer(s) using the Printer/Add command.

List Options

Printers Option Button

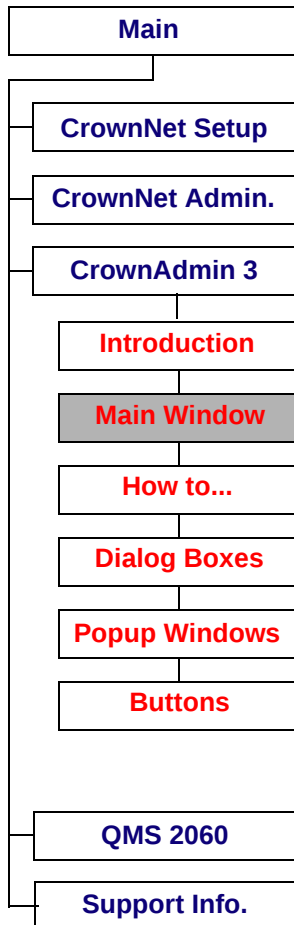

Select this radio button to see individual printers displayed in the list area in the main CrownAdmin 3 window.

Groups Option Button

Select this radio button to see group displayed in the list area in the main CrownAdmin 3 window.

Sets Option Button

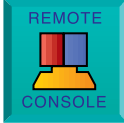

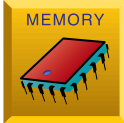

Select this radio button to see sets displayed in the list area in the main CrownAdmin 3 window.

Printer Configuration Buttons

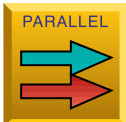

The configuration buttons on the right side of the main CrownAdmin 3 window can be used to choose network interface configurations and printer configurations. This table gives you a brief overview of each button. For more information on printer configurations see your printer documentation.

» **Note:** *The appearance and function of some of these buttons depend on the options installed on your printer.*

Button	Description	Button	Description
	Use this button to update your list of printers in the main window.		Use this button to start a Remote Console session with the selected printer.
	Use this button to open a status window for the selected printer.		Use this button to reset the CrownNet interface or to put interface configuration changes into effect
	Use this button to access printer system identification information for the selected printer.		Use this button to access memory configuration values.

Button	Description	Button	Description
	Use this button when TCP/IP protocol is available to access printer and interface information.		Use this button to access information about the jobs the selected printer is processing.
	Use this button to access administration configurations for the selected printer.		

- » **Note:** When accessing the input and output trays on the selected printer you must add a 1 to each tray number to select the correct tray. Normally, the trays on QMS printers are numbered consecutively (1,2,3). From CrownAdmin 3 you must access these trays as 2, 3, 4. See your printer documentation for more information on input and output tray numbers.

System Button

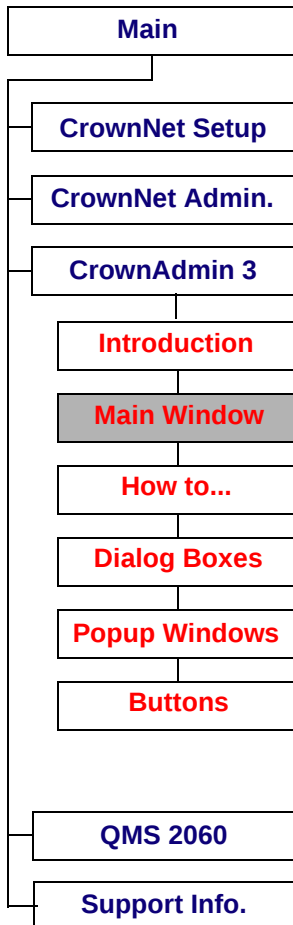

The System button in the main CrownAdmin 3 window displays the following when chosen:

- I/F List
- Printer Name
- Printer Status

» **Note:** *This button functions only if the TCP/IP protocol is available.*

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of individual printers.

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of groups of printers.

Jobs Button

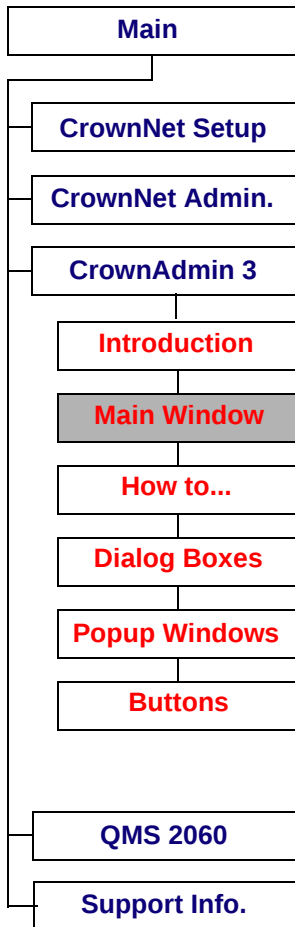

The Jobs button in the main CrownAdmin 3 window displays the following options when chosen:

- Jobs
- Page
- Sheet
- Status

» **Note:** *This button functions only if the TCP/IP protocol is available.*

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of individual printers.

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of groups of printers.

Admin Button

The Admin button in the main CrownAdmin 3 window displays the following options when chosen:

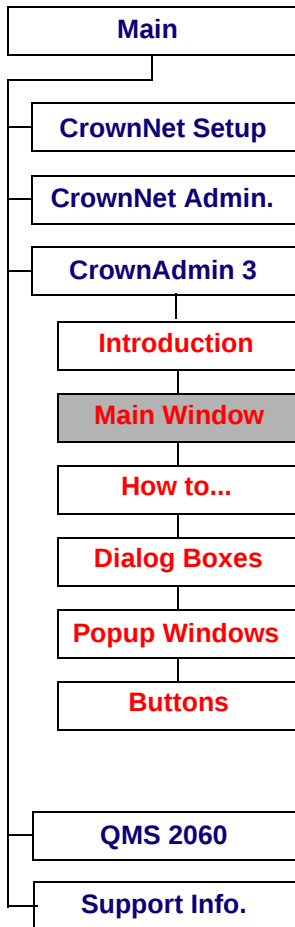

- Configuration Status
- Old IP Address
- Unit Status

» **Note:** *This button functions only if the TCP/IP protocol is available.*

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of individual printers.

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of groups of printers.

» **Note:** *The CrownNet interface configuration options apply to group and individual printers only, not sets. For information on the specific interface protocol buttons, see the CrownNet documentation.*

SNMP Button

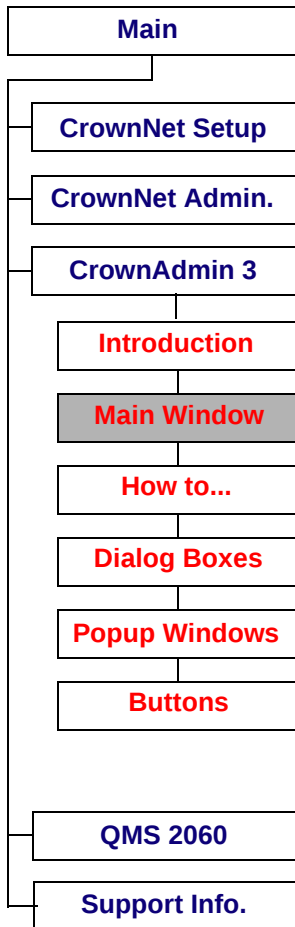

The SNMP button in the main CrownAdmin 3 window displays NMS Configuration options when chosen.

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of individual printers.

Click [here](#) to see step-by-step instructions on changing CrownNet interface configurations of groups of printers.

» **Note:** *This button functions only if the TCP/IP protocol is available.*

CrownAdmin Configuration Buttons

Rescan Network Button

Use this button to refresh CrownAdmin for the latest network settings.

Remote Console Button

This button opens the Remote Console Window for the selected printer.

Printer Status Button

Choose the Display Status command from the Printer menu (or choose the Printer Status button) in the main CrownAdmin 3 window to display status information for the selected printer, group, or set of printers.

The following status information is displayed:

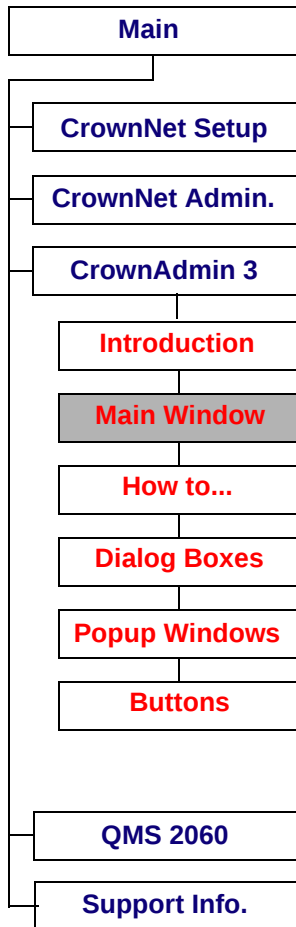

- Whether the printer is on line or off line.
- Whether any errors are occurring at the printer (such as a paper jam).
- Whether any jobs are currently at the printer.
- What status message appears in the printer's message window (messages are displayed as they appear in the printer's message window; see your printer documentation for a detailed explanation).

Status is updated at 5-second intervals by default, but this interval can be changed in the Printer Status dialog box.

CrownNet Soft Reset Button

The CrownNet Soft Reset button in the main CrownAdmin 3 window allows you to reset the QMS CrownNet interface (not the entire printer). It is used to put certain CrownNet interface configuration changes into effect.

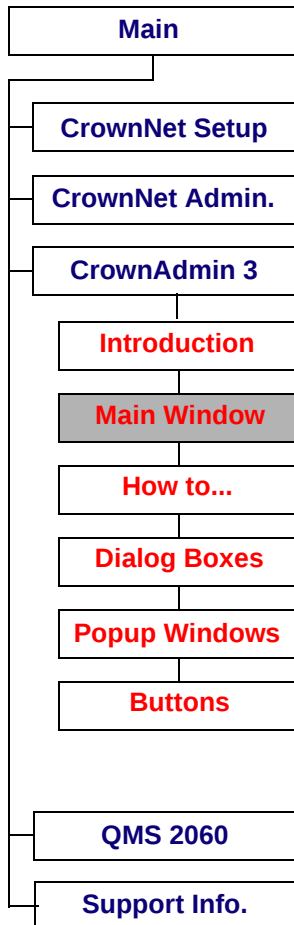

The reset takes effect as soon as the CrownNet interface is idle and the printer is on line.

File Menu

This menu in the main CrownAdmin 3 window contains the following commands:

Help Menu

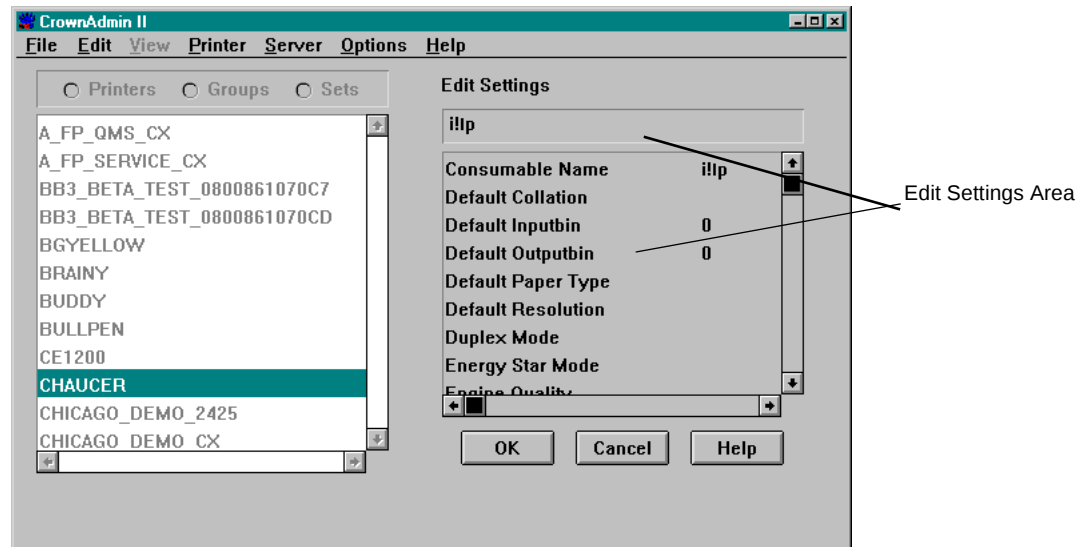

This menu in the main CrownAdmin 3 window contains the following commands:

- Contents
- About CrownAdmin 3

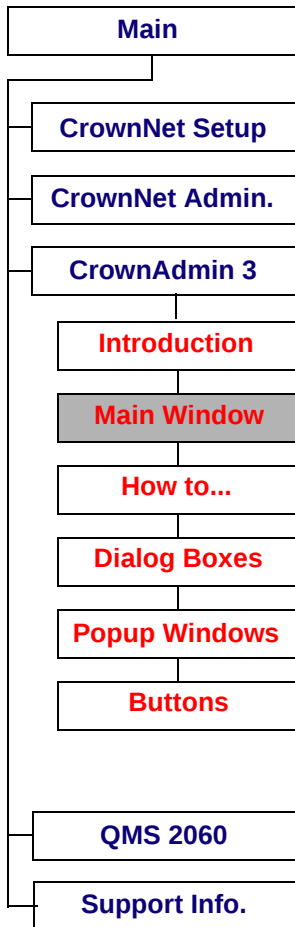

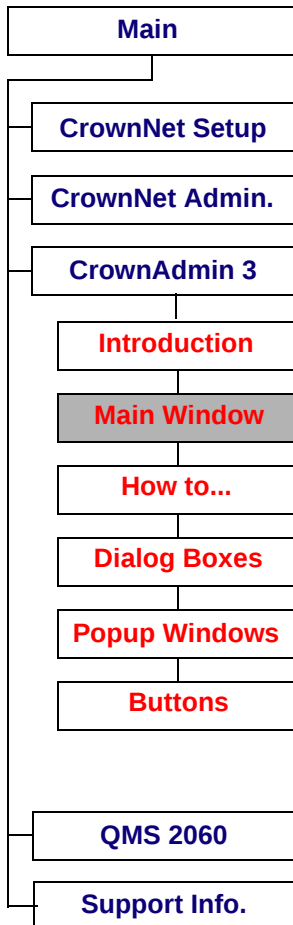

Edit Settings Area

This area appears on the right side of the main CrownAdmin 3 window when one of the Printer Configuration buttons is selected:>

» **Note:** Changes made to text variables in the Edit Settings area must be typed in ALL CAPITAL LETTERS.

Printer Name

This field in the Edit Settings Area displays the name of the currently selected printer.

Printer Status

This field in the Edit Settings Area displays the status of the currently selected printer.

Status messages displayed depend on the type of printer being monitored. See your printer documentation for a list of status messages and their meaning.
